James Beringer

[JB]

2112 East Carson Street ● Pittsburgh, PA 15203
Phone: 724.831.7326 ● E-Mail: jberinger@wesco.com

Objective

I am seeking a fulfilling position that contributes to the growth and optimization of both the department, and the organization by utilizing my skills and innovative thinking, as well as furthering my knowledge in the field.

Experience

WESCO Distribution   **May 2015 – Present**

While working for WESCO on the eCommerce Help Desk, I spent a majority of my time fielding calls and emails. When not doing that, I would be working on the SIM updater tool (created to update SKUs for products in the VMI solution) or working on getting a report to automate using PowerShell. I've also been working on some fixes for bugs for the sites we manage. Regardless of what I'm working on, I was always required to work with other members of the eCommerce department ranging from gathering requirements for a project or enhancement, to determining the root cause of a bug or issue.

Robinson Fans Inc.   **May 2014 – August 2014, December 2014**

During my time at Robinson, I worked as an intern in the IT department focusing in data management and business intelligence. While employed, I worked with PowerPivot reports, SQL Server, SharePoint, and InfoPath. One of the projects I worked on was a PowerShell script to refresh the data in the PowerPivot reports (as the refresh service wasn't available) that would update multiple times a day.

Education

University of Pittsburgh at Bradford   **September 2010 – April 2015**

I completed the Computer Information Systems and Technology (CIS&T) program after two years of being in the Computer Engineering program. During my time in the CIS&T program I have gained many of the skills listed below. The last project I completed was my capstone. Information on that can be found at jamberin.wordpress.com.

Technical Skills

Strong Knowledge
- Microsoft Office Suite
  - Excel PowerPivot Reports
- SQL Server (2008, 2012, 2016)
  - Proper Query Practices
  - Troubleshooting & Organization
- Microsoft Visual Studio (ASP.NET C#)
  - Web Apps & Windows Forms with SQL Integration
- Familiarity with Operating Systems
  - Windows 7, 8 & 10
  - Mac OSX
  - Linux (Ubuntu & Fedora)
- PowerShell
  - Automated Reports & Tools
- Command Prompt (Batch Scripting)

Intermediate Knowledge
- SharePoint
- VMWare/VirtualBox/Hyper-V
- Java
- HTML & CSS
- Windows Server 2008 R2 and 2012
  - IIS (Internet Information Services)
  - Active Directory Protocols and best practices
- Linux Terminal
- Git
